There is one incorrectly spelt word in each line. Select the incorrectly spelt word and write the correctly spelt word in the box.

Palaeontologists - the sceintists that study extinct life -

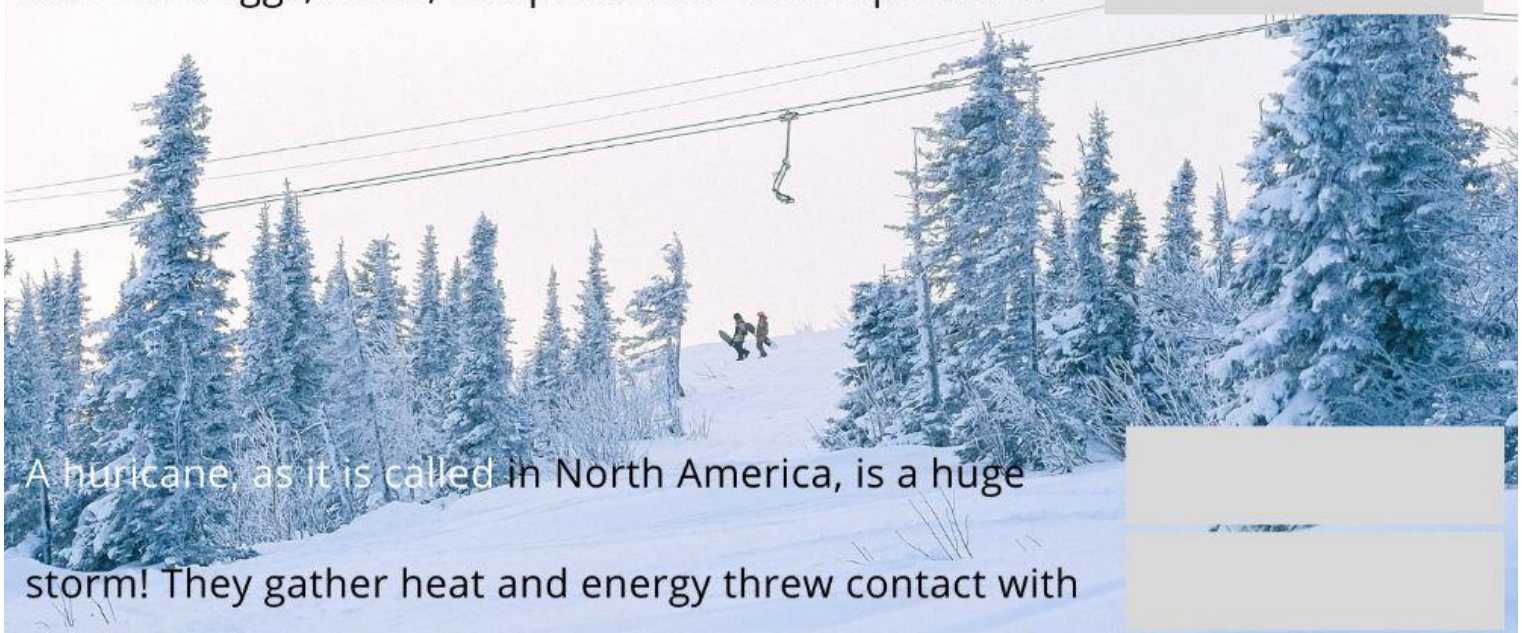

have a surprising aray of tools for examining the

fosilised remains of animals and plants to determine how

they might have appearred and behaved when alive.

In the case of dinosaurs, we have their skelentons, but we

also have eggs, nests, footprints and skin impresions.

A huricane, as it is called in North America, is a huge

storm! They gather heat and energy threw contact with

warm ocean waters. Evapouration of seawater increases

their power. These storms typicaly form between 5 to 15

degrees latitude north and south of the equater. The

centre of the storm or "eye" is the clamest part.
