

Finding Circumference and Diameter

$$\pi = 3.14$$

D = Diameter

If this circle has a Diameter (d) of 8cm, what is its Radius (r)?

$$r = \underline{\quad} \div 2$$

$$d = \underline{\quad} \text{ cm}$$

$$= 8 \div 2$$

Drag answers to their correct boxes

$$= \underline{\quad} \text{ cm}$$

d 8 4

What is this circle's Circumference?

$$C = \pi \times d$$

$$= \underline{\quad} \times \underline{\quad} \quad 8 \quad 4 \quad 3.14 \quad 25.12$$

$$= \underline{\quad} \text{ cm}$$
