CLASSWORK # 1

Trade schools

A. Read the following passage.

Trade schools

For those people who are not interested in any four- year plans of study at universities and prefer to work with their hands, there are trade schools. What's important is to continue your education.

There are many different job opportunities that are offered when you complete a degree in a trade school. If you want to work on people's houses, you can study to become a plumber or an electrician. A plumber fixes anything that has to do with water in the house, while an electrician specializes in lighting and electrical work. You can also be a construction manager, supervising people building a house.

There are also technical careers (that involve two years of study) in technology. You can be a computer programmer, designing new video games and computer programs to make our lives easier. You can also be a web developer, creating and improving websites for individuals or companies. Electronical engineer is another option, where you build and repair electronic equipment.

If you prefer to work outside, there are a few options you can study. A garden and landscaping designer can help to create a paradise outside for residents. You can also study environmental science and work in forests to protect our flora and fauna. Or there are petroleum engineers that work on getting the oil out of the earth.

As you can see, there are several options if studying at a four-year university is not for you. Just try to combine what you are good at and what you love, and you should find the perfect job for you!

I am the profession that prepares all other professions. What's the hardest part? Seeing that you may not be able to help everyone. But the best part is knowing that your influence can last a lifetime

I love to work with bones and dig for ancient treasures. It's hard work sometimes, but it is so rewarding to discover parts of history

My main job is to serve others. After all, that's what I was elected for!

I am a creator, and I even consider myself an artist. Everyone thinks my job is simple and that everyone can do it, but some people can't even match their own outfits!

My job is very solitary. I have to spend a lot of time with a machine and sometimes that gets lonely. But I am motivated knowing that I am creating things that will make people's lives easier and even entertain them!
