Energy: types of energy

is everything that produces changes in things.

The main types are:

:

This is the light that comes from the **sun** or **light bulbs**.

:

Bodies have this energy, because **they are moving**.

: We find this in **batteries** or **food**.

:

This is **heat**, as the given off by an **iron** or **heater**.

:

It makes **electrical appliances work** (TVs, cooker...)
