

**Solve the 2-step word problem.**

There are 112 tomatoes.

8 of them are rotten.

We packed the good tomatoes in bags of 8 each.

How many bags did we pack?

Step 1	Step 2	Long division sum
<p>112 tomatoes – 8 rotten tomatoes are equal to the number of good tomatoes?</p> <p><b><math>112 - 8 = \underline{\hspace{2cm}}</math></b> good tomatoes</p>	<p>Take the number of good tomatoes and divide them by 8.</p> <p><math>\underline{\hspace{2cm}} \div 8</math></p>	<p>What will the long division sum look like?</p> <p>8 <math>\overline{)104}</math> - <math>\underline{\hspace{2cm}}</math></p>

We packed \_\_\_\_\_ bags of tomatoes.
