Sound

How are sounds made?

Sound can be made louder by giving the vibration more energy.

Sound is made when an object vibrates.

How do we hear sounds?

What makes sounds louder or quieter?

The pitch is how high or low a sound is.

When an object vibrates, it moves back and forth very quickly.

What is volume?

What is a vibration?

When the vibrations reach your ear, you hear the sound.

Volume is how loud or quiet a sound is. The volume of sound is measured in decibels (dB).

What is pitch?
