

Cálculo de PERÍMETRO

Recuerda que el **PERÍMETRO** es la suma de todos los lados.

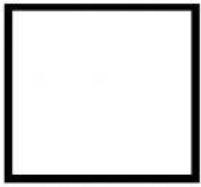

Cuando las figuras no tienen los lados iguales es necesario realizar una suma. Por ejemplo:

Pero cuando los lados de la figura son todos iguales puedes realizar una multiplicación X el número de lados. Por ejemplo:

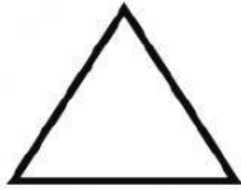

Calcula mentalmente el perímetro de las siguientes figuras:

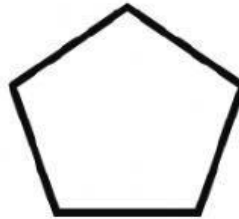

20 cm

P= _____ cm

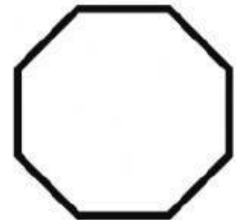

50 cm

P= _____ cm

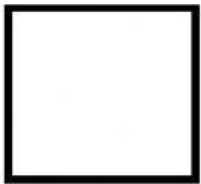

30 cm

P= _____ cm

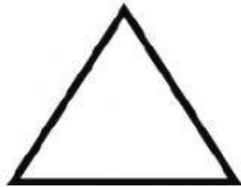

10 cm

P= _____ cm

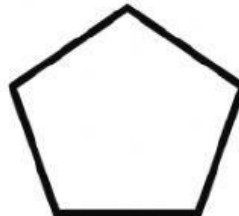

8 cm

P= _____ cm

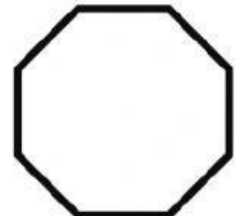

6 cm

P= _____ cm

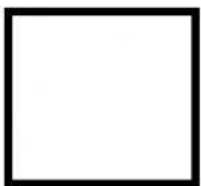

9 cm

P= _____ cm

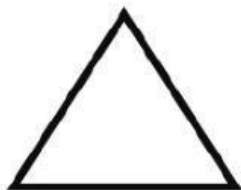

7 cm

P= _____ cm

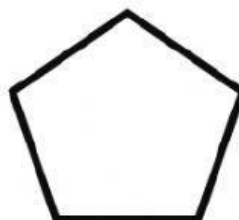

15 cm

P= _____ cm

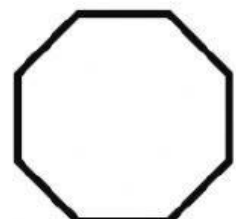

40 cm

P= _____ cm

50 cm

P= _____ cm

30 cm

P= _____ cm
