### Fractions - Word Questions Ex. 6c

1) Mark ate  $\frac{7}{12}$  of a bar of chocolate. What fraction was left?

Solution:

Whole =  $\frac{12}{12}$

Fraction eaten =  $\frac{7}{12}$

$\therefore$  Fraction left =  $\frac{12}{12} - \frac{7}{12} = \frac{5}{12}$

2) I spilt  $\frac{3}{5}$  of a pitcher of milk. What fraction remained?

Fraction remaining = \_\_\_\_\_ - \_\_\_\_\_ = \_\_\_\_\_

3)  $\frac{7}{11}$  of the pupils in my class are absent. What fraction is present?

Fraction Present = \_\_\_\_\_ - \_\_\_\_\_ = \_\_\_\_\_

4) Tim spent  $\frac{5}{6}$  of his money and saved the rest. What fraction did he save?

Fraction saved = \_\_\_\_\_ - \_\_\_\_\_ = \_\_\_\_\_

5) I have read  $\frac{2}{7}$  of my book. How much more do I need to read to finish the book?

Fraction to read = \_\_\_\_\_ - \_\_\_\_\_ = \_\_\_\_\_
