

China's big problem

Read the text about China and answer the activities

China is the world's biggest **polluter**. But **toxic smog** in its cities is increasingly **generating** enormous public anger.

Now the authorities say they want the green industries to have a **turnover** of more than \$700bn by 2015. They're offering **tax breaks** and **subsidies** to **promote** growth and **innovation** within the **sector**.

It's the latest move by the government to **curb** pollution. Last month, the authorities ordered hundreds of steel, paper and leather factories to shut down production lines that were causing **high levels** of pollution.

Match the vocabulary with the definitions.

	Vocabulary	Definition
