4. Read and select true or false.

SEAHORSES

Seahorses are 30 centimetres long.

They've got a long curled tail and a long, thin head.

They've got very hard skin and they can change colour, too. Seahorses eat tiny fish and plants.

Do you know that seahorses haven't got any teeth or a stomach?"

- + Seahorses are smaller than fish.
- + Seahorses have always the same colour..
- + Seahorses only eat meat...
- + Seahorses don't have teeth.

5. Translate into English or Spanish. (choose)

La foca es más grande que la tortuga.

Las medusas son más coloridas que los cangrejos.

A starfish is prettier than the octopus.

In Hawaii you can make beautiful sandcastles.
