

USE THE FOLLOWING INFORMATION TO COMPLETE THE TEXT BELOW:

nucleus - no charge - electrons - neutrons -  
positive - negative

1-A proton has a \_\_\_\_\_ charge.

2-A neutron has \_\_\_\_\_, it is neutral.

3-An electron has a \_\_\_\_\_ charge.

4-The \_\_\_\_\_ of an atom is made up of protons and \_\_\_\_\_.

5- \_\_\_\_\_ orbit the nucleus of an atom.

READ AND COMPLETE THE SENTENCES WITH THE FOLLOWING WORDS:

negatively - neutral - charged - positively

1-When there is an equal number of protons and electrons in an object, we say that the object is electrically \_\_\_\_\_.

2-When there is an unequal number of protons and electrons in an object, we say that the object is electrically \_\_\_\_\_.

3-When there are more protons than electrons in an object, we say that it is \_\_\_\_\_ charged.

4-When there are more electrons than protons, we say that the object is \_\_\_\_\_ charged.
