

# Classifying Instruments

1) Match the word to its definition

**Idiophones**

Sound is created by a vibrating string or strings stretched between two points.

**Chordophones**

Sound is created by a vibrating stretched membrane.

**Aerophones**

**Membranophones**

Sound is created by causing a body of air to vibrate.

Sound is created by the vibration of the whole instrument.

2) Can you drag the instruments into the correct box?

Chordophones	Idiophones	Membranophones	Aerophones
