

# SOCIAL STUDIES WEATHER & CLIMATE

State whether the following are true or false

1. The atmosphere exerts the same amount of pressure around the globe.
2. The barometer is used to measure atmospheric pressure.
3. Temperature, altitude and gravity influence our atmospheric pressure.
4. There are 6 layers in the atmosphere. The troposphere, stratosphere, mesosphere, thermosphere, exosphere and outersphere.
5. Cold air creates a low pressure system which brings about calm fair weather.
