ASSIGNMENT 1

INSTRUCTIONS!

Answer the questions based on the text!

Human body is made up of countless millions of cells. Food is needed to built up new cells and replace the worn out cells. However, the food that we take must be changed into substances that can be carried in the blood to the places where they are needed. This process is called digestion.

The first digestive process takes place in the mouth. The food we eat is broken up into small pieces by the action of teeth, mixed with saliva, a juice secreted by glands in the mouth. Saliva contains digestive juice which moisten the food, so it can be swallowed easily.

From the mouth, food passes through the esophagus (the food passage) into the stomach. Here, the food is mixed with the juices secreted by the cells in the stomach for several hours. Then the food enters the small intestine. All the time the muscular walls of the intestine are squeezing, mixing and moving the food onwards.

In a few hours, the food changes into acids. These are soon absorbed by the villi (microscopic branch projections from the intestine walls) and passed into the bloodstream

1. What is the text about?

- A. The digestive system
- B. The digestive juice
- C. The method of the digestive system
- D. The process of intestine work
- E. The food substances

2. How can we swallow the food easily?
- A. The food changes into acids absorbed by the villi.
 - B. The food must be digested first through the process.
 - C. The food is directly swallowed through esophagus into the stomach.
 - D. The food is mixed with the juices secreted by the cells in the stomach.
 - E. The food we take must be changed into substances carried in the blood to the places.
3. From the text above, we imply that
- A. a good process of digestive system will help our body becoming healthier.
 - B. no one concerned with the process of digestive system for their health.
 - C. the digestive system is needed if we are eating the food instantly.
 - D. every body must conduct the processes of digestive system well.
 - E. the better we digest the food we eat, the healthier we will be.
4. "Human body is made up of countless millions of cells." (Paragraph 1) The phrase "made up" means
- A. produced
 - B. managed
 - C. arranged
 - D. completed
 - E. constructed
5. Where did the digestive process happen for the first time
- A. Tongue
 - B. Tooth
 - C. Mouth
 - D. Esophagus
 - E. Stomach

ASSIGNMENT 2

INSTRUCTION!

Choose the sentences whether it is true or false

(It is about passive sentences, using some different tense)

- | | | |
|--|----------------------------|----------------------------|
| 1. The language institute has been opened to relocate the students off the main campus | ☐ T | ☐ F |
| 2. Today the winners is announced by the committee | ☐ T | ☐ F |

4. My sister alwayst her boy friend last week
5. My father was reading a book when Ithe bedroom

ASSIGMENT 4

INSTRUCTION!

Lengkapi paragraph dibawah ini dengan menggunakna kata kata yang tersedia

Almost everyone likes a natural phenomenon called the rainbow. To the extent that a lot of people create an art work like song, cake, and the other work after the beautiful colors of the rainbow. But, do you know how the phenomenon of the appearance of the rainbow happens?

Rainbow because of the refraction of light. The sunlight that shines in between the rain drops is refracted by the rain drops. This process separates the white light of the sunlight into a spectrum of colors.

The spectrum of colors are red, orange, yellow, green, blue, indigo, and violet. Or what we often memorize as the abbreviation "ROY G BIV / *mejikuhibiniu*." Then the colors reflect in the back drops of rain, resulting the light which looks arched and the rainbow.
