

## ADDING SUBTRACTING FRACTIONS WITH LIKE DENOMINATORS SHEET 2

*Add or subtract the fractions then simplify the answer if needed.*

$$1) \quad \frac{4}{7} + \frac{3}{7} = \frac{\quad}{7} = \frac{\quad}{\quad}$$

$$2) \quad \frac{3}{10} - \frac{1}{10} = \frac{\quad}{10} = \frac{\quad}{5}$$

$$3) \quad \frac{7}{11} - \frac{3}{11} = \frac{\quad}{\quad}$$

$$4) \quad \frac{3}{9} + \frac{3}{9} = \frac{\quad}{\quad}$$

$$5) \quad \frac{1}{8} + \frac{3}{8} = \frac{\quad}{\quad}$$

$$6) \quad \frac{11}{12} - \frac{2}{12} = \frac{\quad}{\quad}$$

$$7) \quad \frac{9}{10} - \frac{4}{10} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$8) \quad \frac{3}{12} + \frac{7}{12} = \frac{\quad}{\quad}$$

$$9) \quad \frac{7}{15} + \frac{3}{15} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$10) \quad \frac{11}{14} - \frac{3}{14} = \frac{\quad}{\quad}$$

$$11) \quad \frac{17}{20} - \frac{12}{20} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$12) \quad \frac{4}{13} + \frac{8}{13} = \frac{\quad}{\quad}$$

$$13) \quad \frac{9}{16} + \frac{5}{16} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$14) \quad \frac{23}{50} - \frac{17}{50} = \frac{\quad}{\quad}$$

$$15) \quad \frac{13}{21} + \frac{8}{21} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$16) \quad \frac{27}{40} - \frac{9}{40} = \frac{\quad}{\quad}$$

$$17) \quad \frac{37}{50} - \frac{17}{50} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$18) \quad \frac{11}{40} + \frac{17}{40} = \frac{\quad}{\quad}$$
