

Desert and Grassland's ecosystem

♥ Read the desert's information

1. Deserts

There are two kinds of desert: hot and dry deserts and cold and dry deserts. In both types of desert there is very little rainfall which makes this the driest of all biomes. Temperatures are extreme, it can be very hot or very cold and there is usually a big variation between day and night temperatures. Plant and animal life is scarce due to the difficult living conditions. Deserts can be found in every continent except Europe.

♥ Answer the questions:

HOW MANY TYPES OF DESERTS ARE THERE?

7

2

3

WHAT ARE THE CORRECT CLIMATES?

HOT AND DRY

HOT AND WARM

HOT AND WET

ARE THERE MANY ANIMALS IN THE DESERT?

YES, THERE ARE.

NO, THERE AREN'T.

♥ Read the grassland's information

2. Grasslands

Grasslands have a hot dry season and a warm wet season. There is more tall grass than trees here because the rain does not fall evenly throughout the year. The soil is usually rich and so crops such as wheat and corn are often grown in this biome. Grasslands have different names in different parts of the world.

♥ Answer the questions:

WHAT ARE THE CORRECT SEASONS?

HOT AND DRY

WARM AND WET

BOTH SEASONS ARE
CORRECT

WHAT ARE THE PLANTS THAT GROW THERE?

ORANGES AND
STRAWBERRIES

WHEAT AND CORN

EVERGREEN AND
CONIFERS
