

UNIT 8 SAVING THE EARTH

1. Join phrases with arrows

- | | |
|-------------------|----------------|
| 1. a climate | a. shortage |
| 2. wind ... | b. jam |
| 3. organic ... | c. Change |
| 4. a water ... | d. a waste bin |
| 5. air ... | e. power |
| 6. traffic ... | f. pollution |
| 7. installing ... | g. farming |

2. Read and complete the table.

Speaker 1: I worry about water. Most of the rivers and lakes in my country are drying up. If there is no river or lake, we can't live. That's the serious problem. To save the water, we should use less water.

Speaker 2: Today we are living in a polluted area. There is a lot of waste everywhere. It is very harmful to us. We need to do something to clean our town. For example we can install waste bins.

Speaker 3: I'd like to say the most serious problem is the climate change. Our globe is getting warmer and warmer. It causes ice melting in Antarctica. That's the huge issue! At least we should plant more trees to save our earth.

Problems	Solutions
water shortage	
waste	
climate change	

3. Match the words to their definitions.

- | | |
|------------------|----------------------------------|
| 1. destruction | a. designed to prevent spilling |
