

Familia del 40

Diagram illustrating the place value of the number 40, showing the relationship between decenas (tens) and unidades (units).

A large blue number 40 is shown. The digit 4 is labeled **decenas** (tens) and the digit 0 is labeled **unidades** (units).

Below the number 40, there are two columns of boxes for writing numbers. The first column is labeled **decenas** and the second column is labeled **unidades**. There are 10 boxes in each column, representing the 10 tens and 10 units that make up 40.

Red arrows indicate the relationship between the digits and the boxes:

- Four arrows point from the digit 4 to the first four boxes in the **decenas** column.
- Four arrows point from the digit 0 to the first four boxes in the **unidades** column.

Each box in the **unidades** column is followed by an equals sign (=) and another empty box, suggesting a place for an equation or a second value.
