

REPRODUCTIVE SYSTEM

1. Write the names of the different parts of the FEMALE and MALE reproductive system.

uterus
vagina
ovary
vulva
Fallopian tube

urethra
testicles
vas deferens
penis

2. Decide if each statement refers to FEMALE reproductive system or MALE reproductive system.

It has ovaries.

The testicles produce sperm.

Ovaries produce ovum.

The uterus is a muscular organ where the baby stays before it is born.

One of its functions is to produce ovaries and protect the baby.

It produces a substance (sperm) that is essential for reproduction.

The main organs are the penis and the testicles.

The sperm go out the body through the urethra.
