

Cells (Test)

Mitochondria	Golgi Apparatus	Nucleus	Nucleolus	Cells	DNA
Virus	Ribosome	Vacuole	Lysosome	Cell membrane	Cytoplasm
Chloroplast	Endoplasmic reticulum	Robert Hooke	Sir Issac Newton		
Prokaryotic	Plant	Eukaryotic	Animal	Organism	Organelles
					Unicellular
					multicellular

1. This synthesis and packages proteins. _____
2. This is the brain of the cell. Controls all the brain function. _____
3. _____ produces energy needed by the cell.
4. _____ holds the cell together and controls what comes in and leaves the cell.
5. _____ is the liquid part of a cell.
6. _____ is a living thing.
7. _____ is the genetic material in a cell.
8. _____ produces ribosomes.
9. All cells on earth can be grouped into _____ and _____.
10. _____ are unicellular and are very old.
11. _____ are multicellular and are more advanced.
12. _____ act as the transportation system in a cell.
13. _____ are the green color pigments that help with Photosynthesis.
14. All living things are made up of _____.
15. _____ was the scientist to come up with the name cells.
16. Eukaryotic cells can be divided into _____ and _____ cells.
17. _____ are found in plant cells and give support.
18. _____ are found in both plant and animal cells and store excess water.
19. _____ are found in animal cells, help with excretion and digestion.
20. _____ are chemicals that enter a cell and multiply.
21. _____ produce proteins.
22. _____ are one celled or single celled.
23. _____ are many cells.
24. _____ are specialized structures in a cells that do a specific function.
