E. She studied accounting all the summer.

29. A : Did you get a ticket for the movie this evening?

B : They were sold out weeks ago.

What does this answer mean?

- A. He couldn't get a ticket.
- B. He may have tickets tomorrow.
- C. The tickets were sold yesterday.
- D. He bought a ticket weeks ago.
- E. The movie has been cancelled.

30. Bat : I have misplaced my watch. Could you lend me yours this afternoon?

Bilguun : My watch? You've never seen me wearing a watch, have you?

What does Bilguun mean?

- A. He is so mean.
- B. His watch is missing.
- C. He has put his watch somewhere.
- D. He doesn't own a watch.
- E. He needs his watch in the afternoon.

31. Look at the notice board. Someone asks you what it means. Choose the best answer :

No parking except
for employees

- A. This is a national park.
- B. Everyone can park here.
- C. The park is not used for workers.
- D. Employees can not park here.
- E. The car park is used only by the employees.

Task 4. Reading

/6x3=18 points/

Read the article and choose the correct answer A, B, C or D :

Recycling is a very important subject, and one that is becoming more so all the time. As we all know, it reduces waste and is good for the environment. But what do recycling centers do with the things we throw away? I found out some very interesting information.

Recycling paper has been the biggest success. In 1990, in the USA, more than 20 million tons of paper were recycled and turned into birthday cards, cereal boxes, and hundreds of other things. Paper is the easiest material to recycle and, as David Dougherty of *Clean Washington* said, "You can use it six times over, then burn what's left to create energy." Wisconsin cow farmer George Plenty had the most interesting use for recycled paper: he uses it instead of straw in his barn. "It's cheaper than straw," he said, "but even if the price were the same, I wouldn't go back."

Plastic is the hardest material to recycle, because there are so many different kinds, all of which need to be treated differently. At the moment, only two per cent of the plastic used in the US is recycled. But it has its uses: one company uses plastic from recycled car headlights to make windows. In some ways they are better than normal windows, because they are much harder to break. Another company, *Image Carpets*, uses plastic to make carpets and rugs. A comment made by the manager showed us how attitudes towards recycling have changed. "We worried that people might refuse to buy the carpets if they knew they were recycled," said sales Manager, John Richmeier. "Now we advertise the fact as a marketing strategy."

Metal is another important material. It is easier to recycle an aluminum can than to make a new one. It is also 20 per cent cheaper, and uses only 5 per cent of the energy that making a new can would use. So many of the things we use are made of metal, and can be reused after they stop working. Recycling car parts, for example, is a big business. There is also very little waste involved in recycling metal. Steel is 100 per cent recyclable, and can be recycled hundreds of times. Recycling steel is cheaper than mining it. A lot of America's **scrap metal** is taken by the Japanese, recycled, and eventually sold back to America as new cars.

20 per cent of America's glass is recycled, and used for a number of things. For example, it can be mixed with asphalt or cement and used to pave streets. It can also be melted down and used to make new bottles. However, unlike the other materials, glass can also be reused commercially in its original form: many types of bottles are returned to bottling plants, sterilized and refilled. Recycling and reusing glass is actually a huge worldwide business, with bottle banks appearing everywhere.

So remember, think before you throw things away – they may still be useful. If we all make an effort to recycle, we can make the planet a cleaner place to live.

32. According to the text, which material is the least difficult to recycle?

- A. paper
- B. plastic
- C. metal
- D. glass
- E. cement

33. Glass can be recycled for making

- A. steel
- B. cans
- C. asphalt
- D. bottle banks
- E. car's windows

34. The word "**scrap metal**" is nearest in meaning to

- A. new cars
- B. melted metal
- C. recycled metal
- D. recycling steel
- E. broken vehicles

35. Which material does not have to be changed to be reused?

- A. paper
- B. plastic
- C. metal
- D. glass
- E. asphalt

36. All the sentences are false **EXCEPT**
- A. glass can be used to cover paths
B. steel is hard to recycle
C. plastics can be used in farming
D. America sends recycled glass abroad
E. carpets can be made from recycled glasses
37. Which material can be reused in its original form many times?
- A. paper
B. plastic
C. metal
D. glass
E. asphalt

Task 5. Error recognition

/5x3=15 points/

Identify and circle the one underlined word or phrase that should be corrected :

38. I personally believe that form filling listening exercises can throw up a lot of potential pitfalls for students and that there are a lot of possible classroom activity for dealing with them.
- A B C D E
39. Grover Cleveland was the only American president which served two non-consecutive terms in the 19th century.
- A B C D E
40. Not much people realize that apples have been cultivated for over 3,000 years.
- A B C D E
41. The earliest form of artificial lighting was fire, which also provided warm and protection.
- A B C D E
42. Tea was first grew in Brazil in 1812. The 19th century tea industry in Brazil was heavily dependent on slave labor, and when slavery was abolished in 1888 the tea trade collapsed.
- A B C D E

PART II

2.1 Match each reaction with the best example.

/6x1=6 points/

Reaction

- a. a criticism
- b. an excuse
- c. a prediction
- d. a suggestion
- e. an opinion
- f. a demand

Example

1. If you drink green tea, you might feel better.
2. She shouldn't have kept your notebook this long.
3. I won't say it again, please forgive me!
4. He might have forgotten the time. He isn't here.
5. You could ask me before you use my phone.
6. You have to take me out to dinner ... twice.

2.2 Read the text and fill each gap with the correct word.

/6x1=6 points/

Sleeping

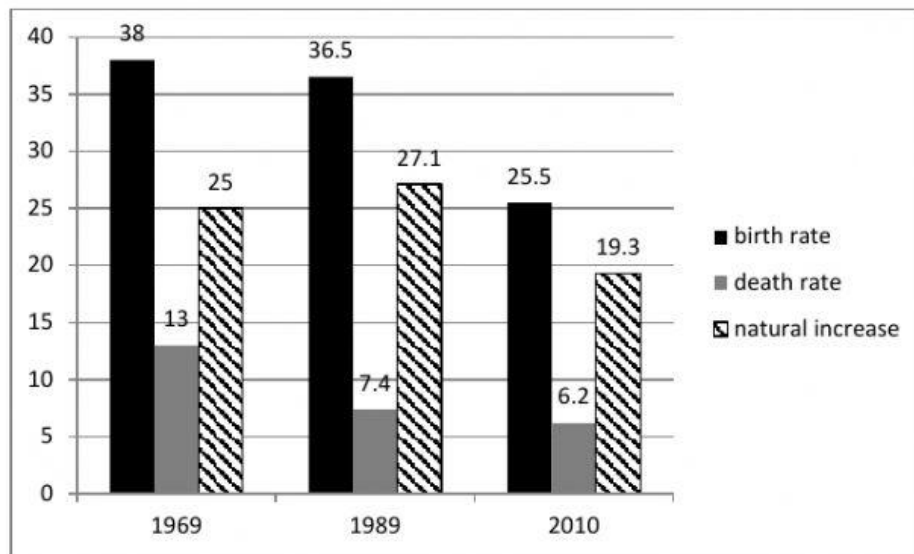

People's sleeping habits have changed over the last 500 years. Before electric lights (a)..... invented, most people went to bed soon after it got dark. Today, we can sleep whenever we want to. Most people (b)..... to sleep between six and eight hours per night during the week and (c)..... to ten hours per night at weekends. 2.3 Look at the chart below and choose the correct answer.

/5x1=5 points/

The following graph shows the population growth of Mongolia between 1969 and 2010 (per 1000 people).

A. The birth rate has from 1969 to 2010.

1. dropped to 8.7
2. decreased by 12.5
3. fallen by 8.7
4. gone up to 38
5. fluctuated between 25.5-36.5

B. The death rate has from 1989 to 2010.

1. increased by 1.2
2. dropped to 2.2
3. decreased by 1.2
4. fluctuated by 6.2-13
5. fallen by 2.2

C. The natural increase has between 1969 and 2010.

1. increased by 6.8
2. fluctuated between 7.4-13
3. dropped to 5.7
4. decreased by 5.7
5. gone up to 25

D. Which year did Mongolia have the least natural growth rate?

1. 1969
2. 1989
3. 2010

E. Which rate fluctuated mostly between 1989 and 2010?

1. birth rate
2. death rate
3. natural increase
