

Planning your speech

Example

Robodriver is the car of the future.

Robodriver is an electric self-driving car. The car can be recharged with sunlight energy.

Robodriver's main benefit is that it will stop accidents caused by human error. Imagine a world where driving your own car and risking an accident is a thing of the past! A world where Robodriver drives everyone to work or to the shops and 100% safely.

Developing Robodriver will cost a few thousand, but it will save many millions of lives.

What is the example invention's name?

Your plan

- 1. What is your invention and does it have a name?**
- 2. How does your invention work?**
- 3. What is the main benefit of your invention?**
- 4. How much it will cost to develop?**
