## Earth Report!

*Futurologist Carla Wright speaks to our journalist*

'We have clear evidence that in the next few years the Earth's climate \_\_\_\_\_ change. With the change of climate, many species of animals, such as the Bengal tiger, disappear. In my opinion, climatic changes \_\_\_\_\_ most probably affect people's lives, too.

For example, because of global warming, the sea has already destroyed some coastal villages and the information we have shows that this destruction \_\_\_\_\_ become \_\_\_\_\_ more widespread in the future.

We can hope that life on Earth \_\_\_\_\_ get better in the future but frankly, I'm not optimistic. Personally, I fear that the quality of our lives \_\_\_\_\_ get worse.
