- Home economics
- Creativity and innovation
- Nutrition

3. Tick what collaboration is **not**:

- The ability to work effectively and respectfully with diverse teams
- Exercise flexibility and willingness to be helpful in making necessary compromises to accomplish a common goal
- Individual work
- Group work with individual outcomes

4. Drag and drop the concepts to the right definition

- Participation Guidelines – Teacher feedback – Time for Reflection - Group Formation - Task structure/activation

- _____: Generally, with more students in a group, a good option to put collaboration into practice is that teachers organize the groups in order to provide students with opportunities to work with other people, not just with their group of friends.
- _____: Collaboration is more likely when teachers set clear guidelines for group participation, such as supporting ideas with reasons or discussing alternative solutions.
- _____: Tasks should be sufficiently complex, authentic, and novel to elicit elaborated explanations and group thinking so that all students can demonstrate the desired performance.
- _____: Teachers play a critical role in monitoring the collaborative activity and providing students with formative feedback on the quality of their collaborative effort during and at the end of a project
- _____: Throughout a project, teachers can also specify time for students to reflect on their own individual participation and the group's processes and progress. Such reflections can be critical for improving the collaborative experience and collecting evidence about the quality of student interactions for assessment purposes
