

Studying at home

Pedro is 12 years old and he's Portuguese. Pedro is a good student and he usually gets good results in his tests and exams, but he now doesn't go to school. The truth is he lives in a big city, where there are many schools, but all the schools are closed. There is a pandemic in the world and children can't go to school.

Pedro studies at home. He's got books, pens and pencils but his lessons are on the computer. Every morning Pedro sits in front of his laptop for three hours and watches and listens to his lessons. His teachers use cameras and interactive worksheets. He can talk to his teachers and the other students in his "class". In the afternoon, Peter often does his homework or he reads History, Geography or Maths books. He always emails his homework to his teachers on Friday afternoon.

All the children are at home at the moment Pedro misses his friends and his teachers but he knows that he has to stay at home. It is all for the best. He hopes the pandemic goes away soon so that he can go back to school and play in the school yard with his friends.
