

Nombre: \_\_\_\_\_

Fecha: \_\_\_\_\_

Objetivo de Aprendizaje:

OA 13: Desarrollar y aplicar la fórmula del área de triángulos, paralelogramos y trapecios.

HABILIDADES: Aplicar - Calcular.

### Área de figuras geométricas

#### I. Calcula el área ( $A$ ) de las siguientes figuras geométricas:

1.)

$$A = \underline{\hspace{1cm}} \text{cm} \times \underline{\hspace{1cm}} \text{cm}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

2.)

$$A = \underline{\hspace{1cm}} \text{cm} \times \underline{\hspace{1cm}} \text{cm}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

3.)

$$A = \underline{\hspace{1cm}} \text{cm} \times \underline{\hspace{1cm}} \text{cm}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

4.)

$$A = \underline{\hspace{1cm}} \text{cm} \times \underline{\hspace{1cm}} \text{cm}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

5.)

14 dm

$$A = \underline{\hspace{1cm}} \text{dm} \times \underline{\hspace{1cm}} \text{dm}$$

$$7 \text{ dm} \quad A = \underline{\hspace{1cm}} \text{dm}^2$$

6.)

3 m

$$A = \underline{\hspace{1cm}} \times \underline{\hspace{1cm}} \text{m}^2$$

$$A = \underline{\hspace{1cm}} \text{m}^2$$

7.)

9 m

6 m

$$A = \underline{\hspace{1cm}} \text{m} \times \underline{\hspace{1cm}} \text{m}$$

$$A = \underline{\hspace{1cm}} \text{m}^2$$

8.)

5 cm

5 cm

$$A = \underline{\hspace{1cm}} \text{cm} \times \underline{\hspace{1cm}} \text{cm}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

9.)

11 cm

$$A = \underline{\hspace{1cm}} \text{cm} \times \underline{\hspace{1cm}} \text{cm}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

10.)

$$A = (\underline{\hspace{1cm}} \text{cm} + \underline{\hspace{1cm}} \text{cm}) \times \underline{\hspace{1cm}} \text{cm}$$

$$A = \underline{\hspace{1cm}} \text{cm}^2$$

*“Amados, si Dios nos ha amado así, debemos también nosotros amarnos unos a otros”.*
