

Name:

Subject: Mathematics

Topic: Solving the unknown

A. $27 + \square = 30$ $\square =$

B. $\square - 23 = 6$ $\square =$

C. $3 + \square = 15$ $\square =$

- D.** Chloe had 9 puppies. Her sister Zoey also had some puppies of her own. When combined, both dogs had a total of 16 puppies. How many puppies did Zoey have?

$$9 + \square = 16$$

$$\square =$$

- E.** Some blackbirds were on Farmer Joe's farm. When they saw the scarecrows 14 blackbirds flew away while 4 stayed behind. How many blackbirds were on the farm before?

$$\square - 14 = 4$$

$$\square =$$
