

# Rights and Responsibilities

When we exercise our rights, it often affects other people. This is why rights and responsibilities always go hand in hand. At school, for example, you have the right to learn in a quiet and safe place. But you have the responsibility not to disrupt class or endanger your fellow students.

Match the rights in the first column with the responsibilities in the second column. Write the letter from each responsibility next to the number of the right it matches.
